9/21/2016

Dear Bruce Marron,

I'm writing to apply for the position of mid-level C# developer at The Dynamic Ecosystems and LandscapesLab. I am confident that I am well qualified for this position - I have half a year of industry experience writing C# code at FEI Company and I am set to graduate with a Bachelor's in Computer Science in April of 2017.

My experience is well-suited for this position. While at FEI Company I used C# to design, develop, test, and optimize a software package to detect an error in images being generated by the electron microscopes. This project was nearly entirely self-driven. During my six months there I refined my skills in C# and Visual Studio to also write various regression tests for the positioning of the stage of the microscopes where I also worked with the employee in charge of the positioning software. While I am not at liberty to provide examples of my work at FEI, I am confident they will vouch for my skills in the language.

I believe my experience at FEI and my accomplishments there make me a promising candidate for this position. I have also attached my resume for your review. If you are interested, feel free to contact me via my cell phone or email.

Sincerely,

Austen Ruzicka
